Every press operator knows the "shrill sing" of the press - caused by a broken seal. Through exchange the broken seal with a new silicone seal string the needlessly burdening noise and the extrem large consumption of air pressure will be removed promptly.

TECHNICAL DETAILS

This around-running silicone seal string is well applicable as replacement in every membrane press. On inquiry the quality silicone seal is available in several diameters or strengths.

4, 6, 8, 10 and 12 mm diameter
(=standard) - immediate delivery from stock.

Also on inquiry available: 0,50 mm up to 50 mm diameter.
